HK\$5,426 million

Management Discussion and Analysis

For the six months ended 30th June, 2008, the Group achieved turnover amounting to RMB2,060.0 million, representing an increase of 9.0% as compared with RMB1,889.1 million for the same period of the previous year. The Group's profit attributable to equity holders for the six months is RMB262.7 million, which is 8.4% less than the corresponding period in 2007. Basic earnings per share for the six-month period amounted to RMB0.16 (2007: RMB0.18).

Since the second half of 2007, several unfavorable factors emerged including downturn of US economy resulting from credit crunch in the global financial market and sharp increase in world crude oil and plastic material prices, the implementation of Chinese new labour law, continued tightening of Chinese austerity measure and this resulted in a decline in availability of financing and cost pressure especially to smaller enterprise and reduction in capital expenditure of our customers. This change in market condition reflected in a rapid and steep decline in demand for plastic injection moulding machines "PIMMs", especially for small PIMMs. Sales of our small PIMMs with clamping force less than 500 tonnages decreased by 2.1% to RMB1,280.1 million. Whereas demand of our large tonnage PIMMs and energy-saving models are less affected. Under this adverse market condition, the Group's still achieved a mild turnover growth of 9.0%, which mainly attributed to the growth in PIMMs used for less-impacted sectors like electrical appliances and automobiles and the continued acceptance of our energy-saving models namely Mars (J5) series has offset the decline in demand in small PIMMs.

For the period under review, our medium to large PIMMs, which are more often used in logistics, automobile and electrical home appliances application, increased by 33.8% to RMB736.2 million. Whereas our Mars (J5) series, the high precision and energy saving PIMMs, has recorded a significant increase in sales by RMB491.0 million for the period represented a growth of 87.4% compared to second half of 2007. Currently, the Mars (J5) series accounted for 23.8% of our total sales for the period under review. The management believes the Group's strategy of product diversification and improvement will continue to improve brand recognition and provide competitive advantage to the Group. For the period under review, the turnover increased by 9.0% to RMB2,060.0 million and once again our turnover growth rate outpaced other industry peers and gained the market share from other industry players.

As a market leader, we are much more resilient to the market softening than other industry players and achieved a mild growth in turnover. The recent unprecedent fluctuation of iron and steel price has adversely affected our profitability. Although we have raised our selling price of products by approximately 6%, improved our product mix in higher margin products (medium to large PIMMs and Mars (J5) series) and taken certain cost saving measures to minimize the adverse impact on our financial performance during the period, the gross profit margin has decreased to 27.6% as compared to approximately 29.1% in 2007. Coupled with increase in the Company's effective tax rate resulted from expiry of certain tax holiday of subsidiaries, the Group's profit attributable to equity holders for the six months is RMB262.7 million, which is 8.4% less than the corresponding period in 2007.

Prospect

The business environment is still clouded with uncertainties such as fluctuation of oil price, the concerns of United States recession and tightening of Chinese austerity measures. Facing with these adverse market condition, our potential customers have temporarily scaled down their capital investment plan and slowed down the purchase of PIMMs. Notwithstanding this, the Group is still confident in the business development in China. With the persistent growth in GDP in China, the surge in domestic demand is expected to continue with the economic growth in China. In the long term, the Group holds a cautious but optimistic view towards its future business development.

Facing the challenge of surge of price in iron and steel, the Group will continue to optimize our product portfolio, formulate appropriate raw material procurement strategies and control its production cost by improving production workflow. Moreover, the Group will consider adjusting its product price as appropriate with suitable timing to cope with the changes in material costs.

We believe the uncertainties of the market condition and high iron and steel price will continue for some time. Although it would be extremely difficult for us to be fully immune from their adverse impact, the Company can still be the few winners by delivering value to our customer needs, improving product mix, and increasing market share. Having our prestigious brand, unmatched quality and specification of products, self-developed core technology and efficient production scale, we are able to create much higher value in the production process than industry peer and maintain satisfactory profitability in this environment. Our strong financial resources and operational efficiencies provide us the capability to seize any opportunity in gaining further market share should further industry consolidation becomes inevitable. The Group will uphold its positive and proactive attitude in meeting current challenges and is ready to react to future market recovery.

Research and Developments of Products

The Group believes research and development constitutes the core competitiveness of the Group in meeting the dynamic needs of customers and sustaining our leadership in future. We are committed to product innovation and our research and development team is comprised of more than 290 engineers and technicians, representing approximately 7.6% of our total staff. In order to further enhance our R&D capabilities, we started a post-PhD R&D programme in January 2008. Under this programme, we will fund a team of PhD graduates working with Beijing University of Chemical Technology to conduct research in new plastic processing technology and developing new PIMM models for future commercialization.

In July 2008, the Group is recognized as one of the first batch innovative enterprises amongst the other 90 companies in China. The companies awarded such honor must have their own patented technologies, well-known brands, strong international competitive edge and technological sustainable development potential, and also passed expert panel evaluations jointly conducted by MOST, the State Council's Assets Supervision and Administration Commission (SASAC) and the All-China Federation of Trade Unions after two years trial observation period. In the future, the Chinese government will give certain policy incentives and increase public funding to bolster research and development in these awarded companies. Other companies awarded with such honor include China Aerospace Science and Technology Co, China Aluminum Co, ZTE Corporation and Lenovo Group.

Recently, the Group's joint research projects for high precision PIMMs with Chinese academic institutions, one of which is regarded as "2007 National Science and Technology Support Program", has received a subsidy funding from government amounted to RMB9.0 million during the period (This subsidy has not yet recognized as income during the period in according to prevailing accounting requirements.) Further funding for this project is still in the process of application.

Research and Developments of Products (continued)

During the period, our products continued to deliver excellent technological and market achievements. Some of awards and market achievements are set out below:

Zhafir all-electric machines:	the evaluation panel of the Kielce exhibition (Poland International Fair of Plastics Processing Plastpol) awarded the medal of "excellent rating"
Energy-saving PIMMs, Mars (J5):	sales increased to RMB491.0 million. for the period represented a growth of 87.4% compared to second half of 2007
Two platen PIMM series:	sales increased to RMB75.0 million. for the period represented a growth of 159.1% compared to second half of 2007

Financial Review

Sales

In spite of the ongoing adverse business environment in the general PIMMs market resulted from the above unfavorable factors, the Group's sales still increased from RMB1,889.1 million to RMB2,060.0 million, representing an increase of 9.0%.

The increase of sales is mainly attributed to (i) the growth in medium to large tonnage PIMMs of 33.8% compared to corresponding period in 2007, (ii) improvement in sales mix, and (iii) increase in selling price of products by approximately 6% during the period.

During the period, the sales to domestic and international market increased by 6.7% and 12.2%. The number of unit sold decreased from 10,000 to 9,000 and average selling price increased from RMB185,000 to RMB224,000. The increase in average selling price is mainly due to increase in sales mix of higher margin products (large tonnage PIMMs and energy saving PIMMs) and increase of selling price during the period.

Financial Review (continued)

Gross Profit

During the period, gross profit reached approximately RMB567.9 million representing an increase of approximately 3.4% compared with the corresponding period in 2007. Overall gross margin has decreased from 29.1% for the corresponding period in 2007 to 27.6% during the period. The decrease in gross margin for the year was mainly due to significant increase in raw material cost but partially offset by (i) raising of selling price by 6% during 2008 and (ii) improved product mix to higher margin products including new generation of energy saving PIMMs and large tonnage PIMMs.

Selling and administrative expenses

The selling and administrative expenses increased by 11.7% from RMB247.0 million for the corresponding period in 2007 to RMB276.0 million during the period. The increase is in line with the sales growth and expansion of the Group's business.

Other income

Other income mainly represented by government subsidy and it decreased by 43.9% from RMB17.4 million for the corresponding period in 2007 to RMB9.8 million during the period. The decrease is because approximately RMB8 million government grants had not been received in the first half of 2008 and it is expected to be recognized as income in the second half of 2008. Besides, the Group also received approximately RMB9.0 million research subsidies from a research project recognized as a National Science and Technology Support Program during the period. However, this subsidy has not been yet recognized as income during the period according to prevailing accounting requirements.

Other losses, net

Other losses, net decreased by 61.1% from RMB23.7 million for the corresponding period in 2007 to RMB9.2 million during the period and mainly represented the exchange losses. In the first half of 2007, there was a significant accounting translation loss incurred from the global offering's proceeds deposited in Hong Kong dollars. In 2008, the Group has deposited most of such proceeds in Renminbi and therefore the exchange losses decreased significantly. In order to hedge the exchange risk of US dollar denominated receivable arised from export sales, the Group has also borrowed a US dollar denominated bank loan amounted to RMB277.4 million during the period.

Financial Review (continued)

Operating profit

As a result of the foregoing, the operating profit decreased from RMB295.8 million for the corresponding period in 2007 to RMB292.4 million during the period.

Finance income - net

Finance income, net decreased by 17.4% from RMB14.6 million to RMB12.0 million was resulted from decrease in average net cash balances during the period.

Income tax expenses

Income tax expenses increased by 80.3% from RMB23.3 million for the corresponding period in 2007 to RMB42.0 million for the period due to tax holiday of certain operating subsidiaries expired after 2007.

Liquidity and Financial Resources

The gearing ratio is defined as net debt (represented by borrowings net of time deposits and bank balances and cash) divided by shareholders' equity. As at 30 June 2008, the Group is in a strong financial position with a net cash position amounting to RMB939.2 million (31 December 2007: RMB1,339.0 million). Hence, no gearing ratio is presented. The bank loan increased from RMB158.8 million in 2007 to RMB277.4 million was due to the group has borrowed a US dollar denominated bank loan amounted to RMB277.4 million to hedge the exchange risk of US dollar denominated receivable arised from export sales and offset by settlement of previous year's Renminbi bank loans.

Charges on Group Assets

As at 30 June 2008, the Group has pledged deposits of RMB6.3 million as collaterals against certain trade finance facilities granted by banks.

Foreign Exchange Risk Management

During the period, the Group exported approximately 30% of its products to international markets which were denominated in US dollars or other foreign currencies, while the Group's purchases denominated in US dollars or other foreign currencies accounted for less than 10% of total purchases. The Group did not utilize any forward contracts or other means to hedge its foreign currency exposure. However the management will closely monitor the exchange rate fluctuations to ensure sufficient precautionary measures against any adverse impacts. During this period, the Group has borrowed a US dollar denominated bank loan amounted to RMB277.4 million to hedge the exchange risk of US dollar denominated receivable arised from export sales.

Contingent Liabilities

As at 30 June 2008, the Group provided guarantee to banks in connection with facilities granted to the customers amounted to RMB206.7 million (31 December 2007: RMB221.1 million).

Employees

As at 30 June 2008, the Group had a total workforce of approximately 3,800 employees, the majority of which were located in China.

The Group offers its staff with competitive remuneration schemes. In addition, discretionary bonuses will be paid to staff based on individual and the Group's performance. The Group is committed to nurturing a learning culture in the organization.

Other Information

Interim Dividend

The Directors have resolved to declare an interim dividend of HK6.5 cents per share for the six months ended 30 June 2008 to shareholders whose names appear on the Register of Members of the Company at the close of business on 19 September 2008. Other Information (continued)

Directors' and Chief Executives' Interests and Short Positions in Shares, Underlying Shares and Debentures (continued)

Long position in shares and underlying shares of associated corporations of the Company (continued)

Notes:

- (1) As at 30 June 2008, Sky Treasure is the holder of 75% of the issued share capital of the Company and Zhafir is a non wholly owned subsidiary of the Company and both are associated corporations under the SFO.
- (2) Such Directors are deemed under the SFO to be interested in shares of Sky Treasure which are held by their wholly-owned investment holding companies.
- (3) In addition, Mr. Zhang Jingzhang and Mr. Zhang Jianming is separately entitled to exercise or control the exercise of one third or more voting power in the general meetings of Cambridge Management Consultants Ltd. and Premier Capital Management Ltd. which are respectively the trustee of the Haitian Employee Fixed Equity Trust and Haitian Employee Discretionary Equity Trust which are interested in 12.74% and 37.24% shares in Sky Treasure respectively. Accordingly, they are deemed under SFO to be interested in such shares in Sky Treasure. Please refer to the prospectus of the Company dated 11 December 2006 for details of the shareholdings of Sky Treasure.
- (4) Such Directors are beneficiaries under a trust which is interested in the share of Sky Treasure.

Save as disclosed above, as at 30 June 2008, none of the directors and chief executive of the Company had or was deemed to have any interests or short position in the shares, underlying shares or debentures of the Company and its associated corporations (within the meaning of Part XV of the SFO), which had been recorded in the register maintained by the Company and the Stock Exchange pursuant to section 352 of the SFO or which had been notified to the Company and the Stock Exchange pursuant to the Model Code.

At no time during the period was the Company, or any of its holding companies, its subsidiaries or its fellow subsidiaries a party to any arrangement to enable the directors and chief executives of the Company (including their spouse and children under 18 years of age) to hold any interests or short positions in the shares or underlying shares in, or debentures of, the Company or its associated corporation.

Interests and Short Positions of Shareholders

As at 30 June 2008, the persons or corporations (not being a Director or chief executive of the Company) who have interests or short positions in the shares, underlying shares of the Company as recorded in the register required to be kept under section 336 of the SFO or have otherwise notified to the Company were as follows:

Name of Shareholder	Capacity/ Nature of interest	Total number of Shares	Approximate percentage of shareholding
Sky Treasure Capital Limited	Beneficial owner (1)	1,197,000,000 (L)	75.00%
Premier Capital	Interest in a controlled	1,197,000,000 (L)	75.00%
Management Ltd.	corporation (2)		
Atlantis Investment	Interest in controlled	80,000,000 (L)	5.01%
Management Ltd.	corporations		

(L) denotes a long position

Notes:

- (1) Sky Treasure Capital Limited ("Sky Treasure") held 1,197,000,000 shares, representing a 75% interest in the issued share capital of the Company as at 30 June 2008.
- (2) As Premier Capital Management Ltd. ("Premier Capital") controlled more than one-third of the voting power at general meetings of Sky Treasure, Premier Capital is deemed to be interested in 1,197,000,000 shares held by Sky Treasure under the provisions of the SFO as at 30 June 2008.

Save as disclosed above, as at 30 June 2008, the Directors are not aware of any other person or corporation having an interest or short position in shares and underlying shares of the Company representing 5% or more of the issued share capital of the Company.

Compliance with the Code on Corporate Governance Practices (the "Code")

The Board is committed to maintaining and ensuring high standards of corporate governance practices. The Board emphasizes on maintaining a Board with balance of skill sets of directors, better transparency and effective accountability system in order to enhance shareholders' value. In the opinion of the directors, the Company complied with all the applicable code provisions of the Code as set out in Appendix 14 to the Listing Rules during the period.

Other Information (continued)

Purchases, Sale or Redemption of Shares

Neither the Company nor any of its subsidiaries purchased, sold or redeemed any of the Company's listed securities during the period under review.

Audit Committee

The Company has an audit committee which was established in compliance with Rule 3.21 of the Listing Rules for the purpose of reviewing and providing supervision over the Group's financial reporting process and internal controls. The audit committee comprises the three independent non-executive directors of the Company.

The Audit Committee has reviewed the Group's condensed consolidated financial information for the period ended 30 June 2008, including the accounting principles adopted by the Group, with the Company's management.

Model Code for Securities Transactions by Directors of the Company

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix 10 to the Listing Rules (the "Model Code") as the code of conduct regarding directors' securities transactions. Specific enquiry has been made to all directors, who have confirmed that they had complied with the required standard set out in the Model Code for the period.

On behalf of the Board **Zhang Jianming** *Chief Executive Officer*
