## **B. REASONS FOR AND BENEFITS OF THE PURCHASE**

The Group had purchased automatic processing line, CNC turning machines and machining centres from Haitian Precision in the past for processing of parts and components for the manufacture of plastic injection moulding machines by the Group. To upgrade the capacity of the Group to process parts and components, the Group would require new automatic processing line, CNC turning machines, machining centres and related equipment. The Company considers that the automatic processing line, CNC turning machines, machining centres and related equipment produced by Haitian Precision are competitive in terms of both technology and price-performance-ratio when compared with similar products in the market from both domestic and overseas suppliers and the products of Haitian Precision have consistently been able to meet the requirements of the Group.
